

# MOULDINGS

## Selectwood (Cedar)

High quality KD clear Western Red Cedar. For exterior use where paint retention, rot resistance and dimensional stability are of importance. Most profiles are primed.

## Selectwood (Poplar)

Made out of the highest-grade poplar, our unique, solid mouldings will add beauty to any room. We can accommodate custom profiles and radius work. Most profiles are primed.

## Selectwood Interior Trim

Selectwood makes distinctive cost effective mouldings from clear kiln dried finger jointed pine for interior applications. They are primed to a superior smooth finish, ready to install with minimal prep work.

## PVC Mouldings

Made of high-grade PVC which gives them superior paint-holding characteristics and a longer life. They will not deteriorate in hostile exterior applications.
