AZEK Color-matched Screws

Length	Quantity/box	Price
2½"	350	

Camo Hidden Deck Fastening System

Features special jigs that fit over individual deck boards. The jigs create a ⅜" gap between deck boards and ensures precise angled screw placement on either side of the deck board side allowing the screw head to be nearly invisible. Screws are available with a standard *Protech* coating guaranteed against rust and corrosion or in stainless steel for coastal environments.
